Sprint Name - **Sprint 0**

Backlog Refinement

Which changes, if any, did your team make to your product backlog?

We added a few more tasks to the backlog after we went over the prototype with the other group and added a few ideas from their suggestions. We also discussed how we can implement the database into the website allowing for populating the website with job objects.

Rolled Over Tasks

Which tasks from the last sprint will be rolled over into this sprint, if any?

As this is the first sprint, no tasks were rolled over to this one.

Sprint Tasks

List out the tasks you have in this sprint, along with their story points and assignee. Add rows as needed.

Task Name	Assignee	Story Points
Create functional HTML	Adam	XL
Complete backend filling of database from Indeed/Snagajob	Jake	L
Add database table and model for users	Owen	L
